FOR PROJECT AND
RESIDENTIAL CONSTRUCTION

NEW PRODUCTS AND FEATURES 2021

Innovations for our joint success

HÖRMANN

A person wearing a long, flowing blue dress and high-heeled sandals is standing on a wooden stage. The background is a large, dimly lit arena filled with a crowd of people. Bright stage lights are visible, and numerous pieces of yellow and orange confetti are falling through the air, creating a celebratory atmosphere. The word "ELEGANT" is overlaid in a white box on the right side of the image.

ELEGANT

Trending surface finish with slate structure

- Surface finish Slategrain for a modern door appearance
- Same price as Woodgrain surface finish
- Available for M- and L-ribbed sectional garage doors

MZ

Universal corner frame in F90B timber partition wall **2**

- With counter frame Vario B53 for prefabricated walls
- Available for steel construction project doors D65 OD
- Available for steel construction project doors H3 OD

■ Available from 1.4.2021

Operator solutions at an attractive package price **1**

- Operator package Economy: Simple solution for barrier-free passages
- Operator package Protect: Convenient solution for hygiene areas
- Available for aluminium / steel tubular frame construction project doors and steel / stainless steel construction project doors

■ Available from 1.4.2021

EW30 **EW60**

Fire protection curtain FlexFire **2**

- Approval in fire protection classes EW30 and EW60
- As a partition, prevents spread of the fire and ignition through heat on the opposite side of the fire

■ Available from 1.4.2021

EI₂30 **EI₂90**

Vertical sliding door with CE marking **3**

- Fire-rated vertical sliding door FHT-OD 30, FHT-OD 90
- Max. size up to 7000 × 6125 mm
- With motor driven opening aid as standard

■ Available from 1.6.2021

Steel frame with concealed, 3-way adjustable Euro hinge 1

- Applicable up to 60 kg door leaf weight
- Optionally prepared for retrofitting or fitting at the factory
- Available in all frame profiles for flush-closing door leaves up to 40 mm door leaf thickness

■ Available from 1.4.2021

Sliding door frame with mechanical self closing 2

- Mechanical door closer with integrated soft-closing and hold open function
- Available for timber or glass door leaves with a door leaf weight up to 100 kg

■ Available from 1.4.2021

Only from Hörmann

VarioFix frames for door leaves up to 80 kg 1

- Fitting with Hörmann 2C fitting foam
- IFT approved
- Available for rebated and flush-closing door leaves up to 80 kg

■ Available from 1.4.2021

Only from Hörmann

VarioFix 3-part disassembled 2

- Optionally primed or powder-coated
- Space-saving transport
- Available for rebated and flush-closing door leaves

■ Available from 1.4.2021

Variable telescopic frame 3

- Simple fitting via universal trapezoidal anchor
- Variable wall compensation via wall width adjustment of up to 50 mm (dependant on the wall width)
- Available for rebated door leaves up to 120 kg

■ Available from 1.4.2021

Stock programme for VarioFix visibility windows **1**

- Final-powder coating in RAL 9016
- Complete door set glazed at the factory
- Stock sizes:
1200 mm × 400 mm (wall width 125 mm)
1200 mm × 1050 mm (wall width 125 mm)
- Equipped with glazing bead L11, glazing sealing in white, single-pane safety glass 6 mm

■ Available from 1.4.2021

Only from Hörmann

VarioFix in stainless steel **2**

- Elegant appearance through welded mitre
- Available in stainless steel V2A or V4A for areas with corrosion protection requirements
- Positive fixing with 2C fitting foam
- Variable fitting for all wall types via adjustable wall widths of -5 mm / +15 mm
- **Visibility window** optional with glazing bead L21 or L22
- **Frame** can be used for rebated and flush-closing door leaves up to 50 kg or 80 kg door leaf weight

■ Available from 1.4.2021

FASTER

Industrial sectional doors series 60

Only from Hörmann

Improved construction

- Quiet, low-wear door travel thanks to optimised track radii and enlarged rollers **1**
- Up to 5 dB(A) quieter door travel thanks to special optional rollers / roller holders
- Optional plastic frame shoe prevents rust as a result of waterlogging on the door frame **2**
- Low headroom track application with 200 mm required headroom without loss of passage height
- Improved bottom seal, with optional accessory up to air tightness class 4
- Optional ThermoFrame with new spacer profile and additional lintel counter seal

Simple fitting and maintenance

- Precisely fitting connection of track and radius through transition sleeves **3**
- Faster fitting thanks to less components and press-fitted screws **4**
- Less suspension points through optional C-rail
- Adjustable locking height with rotary latches and shootbolts
- Recess at the frame shoe facilitates work if the floor is not yet finished

1

2

3

Door opening up to 1 m/s:
The fastest sectional door
from Europe's no. 1

High safety

- No pressing open of the uppermost section and very quiet door closing due to the new twin rollers **5**
- High break-in resistance in all door versions and door sizes through anti-lift kit on both door sides as standard **6**
- Optional, certified RC 2 security according to DIN / TS 18194 for additional burglar protection

■ Available from 1.6.2021

The certified RC 2 security according to DIN / TS 18194 is recommended by police information centres. Further information can be found at www.k-einbruch.de

Only from Hörmann

Speed control with
conical cable drums

Industrial operators WA 500 FU 1

- High door travel speed from up to 1 m/s with control 560, or up to 0.5 m/s with control 545
- Soft start and stop for a gentle door travel
- Constant door travel speed also with high-lift and vertical track application (H and V track applications)

■ Available from 1.6.2021

Door opening
twice as fast*

1

Operator ITO 500 FU 2

- High door travel speed
up to 0.5 m/s with control 560 or
up to 0.3 m/s with control 545
- Ceiling-mounted operator with frequency converter based on WA 500 FU
- Soft start and stop for a gentle door travel
- Available for industrial sectional doors,
non-protruding up-and-over door ET 500
and sliding door ST 500

■ Available from 1.6.2021

2

Approx. 20 %
less expensive*

1

Only from Hörmann

With BlueControl as standard

Control 545 1

- Door travel speeds of up to 0.5 m/s with operator WA 500 FU
- 4 × 7-segment display for time stamps for events
- Easy installation via BlueControl app via Bluetooth as standard
- Energy-saving function
- Automatic programmable timer
- Suppression function when installing a photocell in the door frame
- HCP bus interface for intelligent accessories such as: SmartControl gateway for remote preliminary maintenance

■ Available from 1.6.2021

For maximum
door travel speed

2

Only from Hörmann

With BlueControl as standard

Control 560 2

Additional functions of control 545:

- Door travel speeds of up to 1.0 m/s with operator WA 500 FU
- Illuminated keyboard
- Separate partial opening position
- Option relay as standard e.g. for connecting limit switch reporting, locking, lights, etc.
- Can be extended to traffic control
- 2 timers as standard for programming scenarios in two different time periods

■ Available from 1.6.2021

* In comparison with WA 400 FU with control B 460 FU

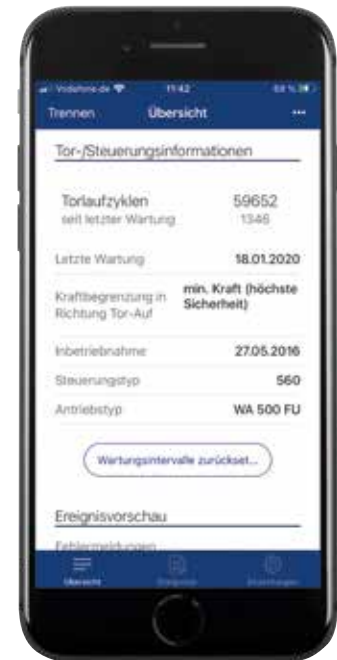

BlueControl

- App for initial start-up, service and maintenance of industrial doors with controls 560 and 545
- App free to download and use
- Clear settings in plain text
- On-site access via Bluetooth without Internet connection

Useful functions save time:

- Simple scanning of the door data via QR code
- Convenient saving and transferring of templates for programming identical systems
- Fast overview of all menu settings
- Practical readout of events and errors with time stamp
- Time-saving forwarding the control data via e-mail (e.g. to the technical service)
- Simple reset of maintenance counter

■ Available from 1.6.2021

Smart set-up and adjustment
of operator control via the app

SmartControl

- 24/7 monitoring and technical door analysis, also remotely
- Online portal with all important door information, e.g. Error messages or door cycles
- No software installation required
- Cost-savings thanks to fewer and shorter service visits
- Fast troubleshooting thanks to online access to operator control
- Fewer and shorter downtimes due to early replacement of wearing parts
- Programming menu settings
- Push messages when configured events occur, e.g. max. door cycles for service visits
- Optimisation of service and maintenance scheduling through forward planning
- Connection of up to 2 controls of the series 500 possible
- Available for all Hörmann industrial doors with control 545 and 560 as well as all Hörmann high-speed doors (from year of manufacture 2015)

■ Available from 1.6.2021

Online analysis and service
for reliable door function

Spiral door HS 7030 PU 42

Expanded size range
up to 8000 mm width or 5000 mm height

- Counterbalance via springs

Particularly easy to service and maintenance-friendly
up to 5000 mm width or 5000 mm height

- Counterbalance via counter weights
- Reduced operating noise due to quiet door travel
- Reduced wear
(in comparison to counterbalance via springs)

■ Available from 1.6.2021

The certified RC 2 security according to DIN / TS 18194 is recommended by police information centres.
Further information can be found at www.k-einbruch.de

With RC 2 safety equipment according
to DIN TS 18194 as standard

Acoustic-rated door HS 5015 Acoustic 1

- 42 mm aluminium hollow profile, filled with 5 mm UPVC and 30 mm PU foam
- Acoustic insulation (without glazing) 31 dB
- New with spiral track application and track application V

■ Available from 1.6.2021

Safety light grille 2

- Particularly reliable function due to the low spacing of the light beams of only 45 mm up to an opening height of 2500 mm
- Maintenance-friendly due to diagnosis of each individual light beam
- Door-protecting due to soft-stop function with obstacle detection (with sufficient remaining travel distance)
- Break-in resistant through messaging when the door leaf is pushed up forcibly
- Automatic correction of the end-of-travel position when the curtain is extended
- As standard with all flexible high-speed doors* as well as with all spiral doors and high-speed sectional doors

■ Available from 1.6.2021

* Except for V 4008 SEL, V 2012, V 3015 Clean, V 3009, V 10008, V 6030 ATEX

High-speed door V 3010

- Self-supporting door construction
- Very short fitting times due to approx. 80 % pre-assembled door construction
- Opening speed from approx. 1 m/s
- Space-saving, integrated control (optional in IP65 jet-water protected)
- No downtimes resulting from a crash thanks to self-threading curtain
- Also available in stainless steel

■ Available from 1.6.2021

ShopRoller SR FTK

- Self-supporting construction
- Also suitable for non-supporting walls, e.g. Glass-aluminium facades
- No visible fixing points
- Suitable for every fitting situation
- Simple and fast fitting

■ Already available

Decotherm ventilation elements

- Arrangement as in Standard or Logistic window profiles
- Compliance with legal requirements
- Natural ventilation, potentially no further ventilation system necessary
- Available for rolling shutter DD, rolling shutter SB, rolling shutter TGT

Ventilation grilles

- Ventilation cross section:
approx. 27.35 cm² / grille element

Ventilation opening

- With door height \leq 2500 mm only available with press-and-hold control or with lintel trap guard with rolling shutters SB and DD
- Ventilation cross section: approx.
57.8 cm² / opening element

■ Available from 1.4.2021

Exclusive door appearance for collective garage doors

- Filling with sintered quartz substrate in the surface finishes Corten steel, stone, concrete
- For the fitting situations flush-fitting, in the opening, behind the opening
- Available as style 499 for non-protruding up-and-over door ET 500, sliding door ST 500, up-and-over door N 500 (each without wicket door), with side and upper fixed elements

■ Available from 1.4.2021 on request

Only from Hörmann

Patent pending:
Moving insulation panel under lip

Dock leveller HTL2 ISO

- Optimal insulation during loading due to 50 mm thick insulation panel below the platform and moving insulation panel under lip ¹
- Ideal for refrigerated trucks with offset loading surface due to lip type IC with approx. 390 mm free overlap length as standard ²
- Easy to fit due to completely pre-assembled insulation
- Maintenance-friendly thanks to easily accessible hydraulics

■ Available from 1.6.2021

* In comparison with an uninsulated dock leveller

Approx. 55 % better thermal insulation*
in home position and when loading

Reduction of transmission losses

- Through 50 mm thick insulation panels directly under the dock leveller and lip **1**
- Insulation of the dock leveller and of the hall floor at almost the same height

Reduction of loss of ventilation heat

- Due to dynamic seals **3**

Combination with low-track sectional door

- Door operation in front of the dock leveller
- Suspended bottom door section, lowered to the insulation panel of the dock leveller **4**
- Optimal seal also in the area of the loading platform
- Easy pit creation due to the small recess of the door operation
- Impact forces transferred to the hall floor **5**
- Door opening only after docking due to tailboard slot of the ramp even when the door is closed
- Further information on page 48

Sizes and versions

- Rated load 60 kN
- Standard sizes up to 3000 mm length
- Telescopic lip 650 mm or 1150 mm (with 2 m length telescopic lip max. 950 mm)
- All fitting modules possible

Low-track sectional door

- Equipped with suspended bottom door section for ramps with door operation in front of the dock leveller (e.g. HTL2 ISO or DOBO) **1**
- Particularly suitable for temperature-controlled halls through low recess for the door operation
- Ideally sealed in the area of the loading platform due to centring and sealing unit **2**
- Available for industrial sectional door SPU 42, SPU 67 Thermo, APU 42, APU 42 Thermo, SPU 67 Thermo

■ Available from 1.6.2021

Dock shelter DDF 10

- No-linkage construction
- Especially robust due to foam-filled side cushions
- Fixing the side flaps using velcro prevents tearing when overstretching
- Very flexible thanks to moving top part
- Particularly easy to fit through pre-assembled top part and frame for side cushions
- Suitable for renovations through largely matching contour to the flap dock shelter with linkage

■ Available from 1.4.2021

Top part lifts
with raising air
suspension vehicle

Side element moves
off to the side without
any damage in the case
of imprecise docking

**NEW: Particularly
easy to fit!**

A close-up, low-angle shot of a muscular man's back and shoulder. He is wearing a dark, short-sleeved shirt. The background is dark, and numerous water droplets are suspended in the air, creating a dynamic, high-contrast scene. The lighting highlights the man's physique and the texture of the water droplets.

STRONGER

Only from Hörmann

Automatic bollards with stone mantle

Security Line bollards with stone mantle

- Available for fixed and automatic bollards with 275 mm diameter with heights of 600 and 800 mm *
- Available in many natural stone types
- Unique design possibility due to matching appearance of fixed and automatic bollards
- Optionally with individual cylinder cover
- Can be combined with additional equipment from the standard programme

■ Available on request

* Except for RI version and bollards with electromechanical operator

Road Blocker 1000 SF

- Simple, fast fitting on the finished floor surface without groundwork
- Only installation of power supply required
- Barrier height 1000 mm
- Passage width 3.5 m; 4.5 m; 5.5 m
- Cycles per day: 2000
- Optionally with EFO emergency function
- M30 compliant with PAS68 / IWA14-1 / ASTM
- Can be used as temporary vehicle blocker

■ Available from 1.6.2021

Number-plate recognition for pay station system

- Convenient number plate recognition using a camera and automatic opening of the barriers on entry
- Secure data recording through encrypted transmission
- Easy payment without a parking ticket by entering the number plate at the automatic pay station
- Checking the number plate with a camera and opening the barrier on exit
- Convenient and simple management and evaluation via Web control

■ Available from 1.4.2021

Number-plate recognition for barriers (ANPR)

- Enter and exit quickly and conveniently
- Integrated management software
- Simple management of vehicle number plates using OnlineControl
- No additional ID card management required
- Available for barriers SH 300, SH 600, SH 800

■ Already available

Hörmann

Access Control HAC

- System developed in-house for barriers and automatic bollards
- Flexible entry and exit management
- Convenient malfunction recognition
- Simple operation via web browser on mobile and stationary devices
- Preparation for barriers as standard and optionally for bollards

Functions at a glance

- Convenient user management incl. user groups
- Management of up to 2000 ID card media for regulating passages
- Issuing individual access authorisation
- Message memory up to 30 days (local) or unlimited with online connection

■ Available from 1.4.2021

Good for our environment Security for a more beautiful home

Climate-neutral doors from Europe's No. 1

We use 100% green electricity in the production of our promotional doors and additionally save several thousand tons of CO₂ through many other measures. We compensate for the remaining emissions by supporting climate protection projects in collaboration with ClimatePartner. You can find further information at www.hoermann.de/umwelt
